

## Zepto Computers

Zepto Computers of Denmark was established in 2002, with the mission of supplying mobile electronics of the highest quality, in attractive Danish design and incorporating the latest technology, all at competitive prices.

Today Zepto is represented in 20 countries, including Australia and New Zealand, is growing fast with more countries coming online constantly, and Zepto is now Europe's largest local manufacturer of notebook computers. The Zepto concept is to offer notebook computers as built-to-order, where the individual customer can put together the specifications that suit the needs and the pocket, and then the notebook is built to that specific requirement.

Zepto focus on functional design and environmental impact. Everything in a Zepto must have a purpose, there is nothing there for 'looks', and we likewise pay a lot of attention to our environmental footprint.

Zepto is a proud member of WEEE (Waste Electrical and Electronic Equipment Directive), and focus on ROHS (Restriction of Hazardous Substances Directive). This means that our products are not only energy efficient and produced in an energy efficient environment, they are also made from material that can be easily recycled and that contain a minimum of harmful substances. The latest Zepto Notus A12 is a brilliant example of what can be achieved. This notebook weighs in at just 1.3kg (including battery), consumes about one third the power of 'normal' notebooks, and has a full working days battery life. And naturally the battery is environmentally neutral.

At Zepto we are proud of our record and invite you to read more about us. Visit our website [www.zepto.com](http://www.zepto.com) or contact us on [zeptoanz@bigpond.net.au](mailto:zeptoanz@bigpond.net.au) for more information.
